### About the Seminar 研討會簡介:

The new global standard CAT-iq for IP broadband voice communication has been introduced by the DECT Forum (*industry association located in Switzerland*) and will gradually substitute DECT and DECT 6.0 in Europe, US, LTAM and Asia. This is a huge global market of 100 million devices per year. CAT-iq includes HD voice quality and is migrating into the gateways (next to WiFi).

This seminar will feature the current status of the technology deployment, the CAT-iq certification program, which started in 2011, and the future profiles of CAT-iq (3.0 / 4.0) for intelligent networking in the connected home.

### About the Speaker 講者簡介:

Erich Kamperschroer is the Chairman of the DECT Forum, the international association of the wireless home and enterprise communication industry. With more than 800 Mio devices sold and growing by more than 80 Mio devices per year, DECT, DECT 6.0\* and their successor CAT-iq\* are worldwide adopted technologies with high relevance for cordless voice and home networking. CAT-iq drives the convergence of telephony (voice) and broadband networks (data) and provides new application categories and product devices.
