<p>5:00pm – 5:30pm</p>	<p>Blockchain Traceability and Transparency</p> <p>The Paris Agreement sets out a global framework to avoid dangerous climate change by 2030. Innoblock has launched a TT Chain ESG platform that helps clients collect and store carbon emission data and generate the ESG report by AI and blockchain technologies. InnoBlock has a client in Cambodia who joined the LOOP+ program (Low-carbon Office Operation Programme) by WWF to reduce environmental impact while integrating sustainability into daily business.</p> <p>The 'E' (Environmental) aspect in ESG, InnoBlock worked with the client to deploy smart IoT sensors such as electricity meters, water meters, and smart lighting in the office building and integrated with TT Chain ESG to collect data for carbon emission calculations. The report generated by these data could facilitate ESG audits and ratings like the program mentioned above. In the 'S' (Social) aspect, TT Chain ESG provides an open API to integrate with the client's HR system or ERP application and collect data automatically, such as attendance, local or international travel, etc. The client feedback that the TT Chain ESG platform helps them reduce their workload and avoid human error from inputting data into the platform.</p> <p>InnoBlock is liaising with some other organisations to add more value-added features to our platform. InnoBlock aims to make TT Chain ESG a global ESG platform to support ESG requirements and meet Paris Agreement before 2030.</p> <p>Speaker 講者: Mr Kevin Ng, CEO, InnoBlock Technology Limited InnoBlock 技術有限公司行政總裁 吳創文先生</p> <p>Q&A Session 問答環節</p>
<p>5:30pm</p>	<p>End of Seminar 研討會結束</p>
